**Re: Substitute Sheets for Advice 3671-E**

Dear Mr. Gatchalian:

Enclosed are an original and 4 copies of substitute sheets for Advice 3671-E, "Contract Between PG&E and Alpine Suntower, LLC, for Procurement of Renewable Energy Resources Resulting from PG&E's 2007 Renewables Portfolio Standard Solicitation."

The original advice letter inadvertently included an error in the table included under the section "Permitting/Certification Status" in the Advice Letter (page 12) and Confidential Appendix A (pages A-6 and A-7).

The attached substitute sheets for Confidential Appendix A contains confidential information and is being submitted in the manner directed by D.08-04-023 and the August 22, 2006, Administrative Law Judge's Ruling Clarifying Interim Procedures for Complying with D.06-06-066 to demonstrate the confidentiality of the material and to invoke the protection of confidential utility information provided under either the terms of the IOU Matrix, Appendix 1 of D.06-06-066 and Appendix C of D.08-04-023, or General Order 66-C. The Declaration Seeking Confidential Treatment submitted with Advice 3671-E on May 11, 2010 is still applicable to the enclosed substitute sheet.

Please telephone me at (415) 973-4612 should you have any questions regarding the replacement of these pages.

/S/ LINDA TOM-MARTINEZ

## 2. Quality of Renewable Resource

The Project is in a well-known and highly predictable solar resource area, and the resource has been verified by an independent third party. The Seller had Luminate LLC, a technically based management consultancy that specializes in the power, energy, and renewable markets, perform a study to confirm the resource viability at the project site.

## 3. Other Resources Required

No other resources are required.

### 1. Development Milestones

#### i. Site Control

Alpine Suntower has site control.

#### ii. Equipment Procurement

Alpine Suntower has informed PG&E that it has a purchase arrangement for the necessary solar PV equipment to be used in the Project following CPUC approval of the PPA. Other long lead equipment will be purchased as necessary to support the Project schedule.

#### iii. Permitting/Certification Status

The following table summarizes key, permits, agreements and licenses PG&E is currently aware of that may be necessary for the construction and operation of the generation facility. Further information is contained in Confidential Appendix A, under the section entitled "Permitting."

The PPA includes the non-modifiable representation and warranty that during the delivery period, the Project will constitute an eligible renewable energy resource certified by the CEC. Alpine Suntower has submitted its application to the CEC for RPS certification.

Name of Permit or Lease required	Grantor	Description of Permit or Lease
Conditional Use Permit ("CUP")	Los Angeles County	General permit for construction of a Solar PV power facility
