San Francisco, CA 94102

Re: Substitute Sheets for Advice 3613-E

Dear Mr. Gatchalian:

Enclosed are an original and 4 copies of substitute sheets for Advice 3613-E, "Five Contracts for Procurement of Renewable Energy Resulting From PG&E's Power Purchase Agreements With Solar Project Solutions, LLC."

The original advice letter inadvertently included errors in the table included under the section "Permitting" in the Advice Letter (pages 12-14) and Confidential Appendix D (pages D-5 to D-7). The tables included in the advice letter and in Confidential Appendix D are identical.

Please telephone me at (415) 973-4612 should you have any questions regarding the replacement of these pages.

/S/ LINDA TOM-MARTINEZ

F. Developer Experience

ENCO Utility Services (“ENCO”) originally started under Edison Enterprises and much of their staff comes from Southern California Edison, including their CEO who was the Vice President of Distribution for Southern California Edison. ENCO has experience in operating and maintenance services in electric distribution.

As a global conglomerate, the parent company of Samsung America has approached solar power from a global perspective, developing projects in South Korea, Greece, Spain, Germany and the United States. As a developer, Samsung has designed, engineered, and installed more than 3 MWs of ground mounted solar systems and in January 2010 Samsung announced a transaction to develop 2,000 MW of wind and 500 MW of solar with the provincial government of Ontario, Canada. Samsung has acted as the main engineering, procurement, and construction contractor for conventional energy projects totaling more than 5,200 MW.

G. Financing Plan

The developer’s plans to obtain financing and any other capital resources are confidential and are described in Confidential Appendix D.

H. Production Tax Credit/Investment Tax Credit

SPS has informed PG&E that the Projects are eligible to receive investment tax credits. Further details are included in Confidential Appendix D.
