Paul --

Thanks, I learned a lot as well.

Ken and I just worked out 24Aug at 130p. Does that work for you?

yours,

sid

Radio-Frequency health effects expert -- available Friday

Sid, the one Monday was great, and I'm interested in the one with the RF experts too.

It did not get rescheduled yet, but we are working on it. I'll let you know when we get experts lined up again.

Friday

Ken --

Cool, I haven't met [Redacted] yet, and I'm afraid the only stat I know is from the Cartoon Guide to Statistics. Would you like us to reschedule for when you and Julie return, or should we go ahead with a group from the ED on Friday?

yours,

sid

-- available Friday

Sid:

Julie is out of the office for two weeks and I will not be here this Friday. I know [Redacted] from the DHS EMF project and her time at the World Health Organization.

**Subject:** Radio-Frequency health effects expert -- available Friday

Julie --

We have an outside expert on epidemiology, whose information I've included below, who would be available Friday to meet with you or your staff to talk about RF issues. I thought this would be a good chance for you to get an additional perspective, if you would find it helpful. Let me know if you or your team are interested.

Thanks!

yours,

sid

Redacted

Research Interests:

Major Discipline:  
Epidemiology and Statistics  
Environmental and Occupational Epidemiology

Major Research Interest:  
Environmental and occupational epidemiology,

epidemiologic methodology, methodologic issues in capturing environmental exposure, public health policy development, non-ionizing (static, extremely low frequency and radiofrequency electromagnetic field exposures) and ionizing radiation, epidemiology of chronic diseases including cancer (particularly breast, leukemia and brain), cardiovascular and neurodegenerative disease.

Current Research Interest:

International health, use of epidemiology for evidence-based health policy, applications of precautionary principle, experimental and non-experimental inference, 60 Hz EMF exposure and childhood leukemia, mobile cell phone and base station health effects, mitigation of, preparedness for, and response to the natural occurrence, accidental release, or the deliberate use of radiation.
