California regulation stable for now

Over the past week we have held conference calls and meetings with Commissioners Bohn, Gruenich and Ryan of the California Public Utilities Commission (CPUC) as well as a meeting with the Executive Director, Paul Clanon. Despite the recent gas explosion, we found that the CPUC remains a professional, balanced regulatory commission despite a difficult period for the organization and PCG.

Upcoming gubernatorial election is important

In our conversations, everyone agreed that President Peevey has played a critical role in the CPUC, particularly in the electric utility policy. To this end, the upcoming California governor election will be important as differing outcomes could well determine whether President Peevey remains. The election is currently tied; a Meg Whitman (R) win, could result in Peevey leaving the CPUC, a destabilizing event in our view.

ROE set through 2012; downward pressure likely

As part of the California regulatory construct, equity ratios and ROEs are decided outside of the GRC and are set for three year periods. CA currently has higher ROEs than the national average. We believe there could be some downward pressure on this, and that these ROEs are likely to come down modestly when they are reviewed in a few years.

PCG: challenging, but not a lost cause

The CPUC acknowledged that PG&E's customer relations have suffered over the past year due to Prop 16, smart meters and the recent gas explosion. However, in our discussions, they commented that the current rate case was not necessarily an appropriate place to address these issues. We believe PCG has handled the immediate aftermath of the crisis, including the \$100M fund set up for victims appropriately. Settlement talks on the GRC continue, and we believe it remains a possibility that a settlement or partial settlement will happen. We currently view the main risk to PCG as higher costs to address pipeline maintenance and legal issues, though we see these as manageable for the size of the company.

Merrill Lynch does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Over the past week, we have met with various people at the CPUC

Despite the recent gas explosion, we found that the CPUC remains a professional, balanced regulatory commission

We are watchful of the upcoming governor election as the governor chooses the President of the CPUC; to date, President Peevey has been an important force on the commission, particularly for electric utilities

Basically, there is a possibility that 3 or 4 members of the CPUC could be new next year

Highlights of California trip

Over the past week, we have had conversations with Commissioners Bohn, Gruenich and Ryan at the CPUC. We also met with Executive Director, Paul Clanon. Our discussions focused on the California regulatory environment, upcoming gubernatorial election, economy pressures, as well as the San Bruno gas explosion.

California regulation stable for now

Despite the recent gas explosion, we found that the CPUC remains a professional, balanced regulatory commission despite a difficult period for the organization and PCG. The Commission understood that it was too early to know what caused the explosion, and did not unduly place the blame on PG&E. We believe PCG has handled the immediate aftermath of the crisis, including the \$100M fund set up for victims appropriately. Despite the current pressures, we believe California regulation remains reasonable for now.

Upcoming governor election is very important

California has a gubernatorial election this year with current front runners Meg Whitman (R) and Jerry Brown (D). These candidates are both relatively even in the polls, though the latest polls have shown Meg Whitman ahead slightly. This gubernatorial election is critical as the governor chooses the president of the CPUC. President Peevey (D) has been on the CPUC for 8 years and has created a predictable regulatory template. We believe that if he is no longer President, he will likely not stay as a commissioner. President Peevey has been an important force on the commission, particularly for the electric utilities, in maintaining a reasonable regulatory environment. In our view, if he leaves, it will be destabilizing.

If Jerry Brown wins, we expect the CPUC to remain largely unchanged with President Peevey remaining. However, If Meg Whitman wins the election, there could be changes to the Commission, including the replacement of President Peevey. In addition, the new governor could impact state RPS goals (33% by 2020) by repealing an executive order signed by Governor Schwarzenegger. While both candidates have declared support for 33% RPS goals, we believe Meg Whitman could take a more measured approach to the development of renewables.

New Commission members?

Currently, of the five current commissioners on the CPUC, Commissioners Bohn (R) and Gruenich's (D) terms are expiring at the end of 2010. In addition, Commissioner Ryan (D) was appointed to the CPUC by Governor Schwarzenegger in January 2010, but has not yet been confirmed by the California state senate, a majority Democratic body. By California law, she can serve for 12 months without a confirmation. We believe if Jerry Brown wins, the Senate may wait to give Brown the opportunity to appoint his own commissioner. That said, if Meg Whitman wins, the Senate could confirm Commissioner Ryan prior to year end. Basically, there is a possibility that 3 or 4 members of the CPUC (depending on President Peevey) could be new next year.

We believe ROEs are likely to come down modestly when they are reviewed in a few years

The CPUC was concerned but balanced in its reaction to PCG

We acknowledge some regulatory risk for PCG, but believe the impact to the GRC from the San Bruno explosion is limited

Settlement talks in the PCG GRC continue, the next update there is due on 9/17

Main concerns for us remain the cost pressures on inspection and maintenance work on the pipeline system as well as the public relations and legal aspects of the explosion

ROE could face modest pressure later on

As part of the California regulatory construct, cost of capital (equity ratio) and ROEs are decided outside of the GRC and are set for three year periods. California currently has higher ROEs (mid 11%) than the national average (~10.5%). We believe there could be some downward pressure on this, and that these ROEs are likely to come down modestly when they are reviewed in a few years. That said, the conversations on ROE were constructive with the Commission understanding the need for healthy utilities and the need to earn a reasonable return on necessary investments.

San Bruno Gas Explosion: CPUC response

As a reminder, on 9/9, a PCG gas pipeline exploded in San Bruno, CA, a suburb of San Francisco, killing at least 4 people with reports that another 3 people are missing and several more are injured. At least 38 homes were totally destroyed and damage occurred to a number of other homes.

In our conversations, the CPUC was concerned but balanced in its reaction to PCG. The Commissioners and Staff did not unduly blame PCG as the cause of the fire is unknown and under investigation by the National Transportation Safety Board (NTSB) and CPUC.

The CPUC acknowledges that PCG's customer reputation has been hurt by the gas explosion, but also Smart Meters and the failed Prop 16 initiative. Most importantly, in our discussions the Commissioners and their staff commented that they view the current GRC case separately from the explosion, and do not believe the GRC decision is not necessarily an appropriate place to address any potential PCG missteps. As we have noted, many key issues for shareholders are not up for review in the GRC, such as large rate base items that have been pre-approved as well as ROE and equity ratio. Thus, while we acknowledge some regulatory risk, we believe the impact to the GRC from the San Bruno explosion is limited.

Longer term, if causality in the San Bruno explosion is linked to PCG, the CPUC could undertake an overall review of the company, institute more strict oversight, institute a fine, and/or impact long-term ROE when it is next up for review.

Settlement talks continue

Settlement talks in the PCG GRC continue, the next update there is due on 9/17. We believe it remains a possibility that a settlement or partial settlement could be reached. We note, the Commission encourages settlement. A settlement could also mitigate some of the workload pressures faced by intervenors and Staff next year when SoCal Edison and San Diego Gas & Electric file their rate cases.

San Bruno Gas Explosion: PCG response

On Monday, PCG established a relief fund of up to \$100 million to assist residents of San Bruno that have been affected by the fire. It is still unclear what the cause of the rupture was.

In an 8-K, PCG noted its \$992M of full liability fire insurance after a \$10M deductible which is supposed to cover damage no matter who caused the fire. Though there had been reports of gas leak complaint calls, these call claims have not been substantiated as PCG has gone through its records. Main concerns for us remain the cost pressures on inspection and maintenance work on the pipeline system as well as the public relations and legal aspects of the explosion. That said, we think the gas pipeline business segment is relatively small compared to the overall size of the company.

Price objective basis & risk

Edison International (EIX, B-2-7, \$33.88)

Our EIX price objective is \$38. We value SCE at \$38/share, based on 13x 2011E earnings, a premium to the industry average. We see zero equity value at EME at current power prices even before adding environmental capex at the coal plants. For EME, in our view, the company cannot be worth negative value to EIX, but we also see a slim chance of material positive value barring a dramatic power market recovery. The downside risk for EIX is an unforeseen negative turn in California regulation. On the upside, a strong power market recovery could cause EME to be worth more than we currently expect.

PG&E Corporation (PCG, A-1-7, \$45.48)

Our \$49 price objective assumes a premium P/E of 12.75x 2012E earnings to account for above average growth and high quality earnings. Risks to our outlook are: 1) outstanding 2011 general rate case and 2) Any unforeseen changes to California regulation.

* Companies in respect of which MLPF&S or an affiliate has received compensation for investment banking services within the past 12 months. For purposes of this distribution, a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofAML Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofAML Comment referencing the stock.

MLPF&S or one of its affiliates acts as a market maker for the equity securities recommended in the report: Edison Intl, PG&E Corp., Sempra Energy.
MLPF&S or an affiliate was a manager of a public offering of securities of this company within the last 12 months: Edison Intl, Sempra Energy.
The company is or was, within the last 12 months, an investment banking client of MLPF&S and/or one or more of its affiliates: Edison Intl, PG&E Corp., Sempra Energy.

15 September 2010

MLPF&S or an affiliate has received compensation from the company for non-investment banking services or products within the past 12 months: Edison Intl, PG&E Corp., Sempra Energy.

The company is or was, within the last 12 months, a non-securities business client of MLPF&S and/or one or more of its affiliates: Edison Intl, PG&E Corp., Sempra Energy.

MLPF&S or an affiliate has received compensation for investment banking services from this company within the past 12 months: Edison Intl, PG&E Corp., Sempra Energy.

MLPF&S or an affiliate expects to receive or intends to seek compensation for investment banking services from this company or an affiliate of the company within the next three months: Edison Intl, Sempra Energy.

MLPF&S together with its affiliates beneficially owns one percent or more of the common stock of this company. If this report was issued on or after the 10th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 10th day of a month reflect the ownership position at the end of the second month preceding the date of the report: PG&E Corp., Sempra Energy.

MLPF&S or one of its affiliates is willing to sell to, or buy from, clients the common equity of the company on a principal basis: Edison Intl, PG&E Corp., Sempra Energy.

The company is or was, within the last 12 months, a securities business client (non-investment banking) of MLPF&S and/or one or more of its affiliates: Sempra Energy.

The analyst(s) responsible for covering the securities in this report receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking revenues.

Merrill Lynch is affiliated with an NYSE Designated Market Maker (DMM) that specializes in one or more securities issued by the subject companies. This affiliated NYSE DMM makes a market in, and may maintain a long or short position in or be on the opposite side of orders executed on the Floor of the NYSE in connection with one or more of the securities issued by these companies: PG&E Corp.

Other Important Disclosures

MLPF&S or one of its affiliates has a significant financial interest in the fixed income instruments of the issuer. If this report was issued on or after the 10th day of a month, it reflects a significant financial interest on the last day of the previous month. Reports issued before the 10th day of a month reflect a significant financial interest at the end of the second month preceding the date of the report: PG&E Corp.

BofA Merrill Lynch (BofAML) Research refers to the combined Global Research operations of Merrill Lynch and BAS.

Officers of MLPF&S or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

This report has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of MLPF&S, any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). Merrill Lynch policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to Merrill Lynch and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This report may contain links to third-party websites. Merrill Lynch is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this report and is not incorporated by reference into this report. The inclusion of a link in this report does not imply any endorsement by or any affiliation with Merrill Lynch. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. Merrill Lynch is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and Merrill Lynch policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports may contain discussions and/or investment opinions relating to securities, financial instruments and/or issuers that are no longer current. Always refer to the most recent research report relating to a company or issuer prior to making an investment decision.

In some cases, a company or issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such company or issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BAS, MLPF&S or any of their affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither Merrill Lynch nor any officer or employee of Merrill Lynch accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this report or its contents.
