SmartMeter

Mike/Carol - regarding the RF matter, we are thinking about installing land lines or fiber to the SmartMeter in households that can provide a doctors certificate that RFs are causing them medical problems. We would use the same protocols for those that are on medical baseline. The extra cost would be socialized within the SmartMeter budget. I worry about the slippery slope issue, but folks here think this might resolve the problem to a large degree. Does this make sense to you ?
