Subject: September 28th Letter to Bloom Energy

Gary: Thank you for your email and letter. Bloom appreciates the effort made and the discretion shown by the Program Administrators in this matter.

Bloom is committed to demonstrating compliance with the Program, and we believe the approach proposed in your letter (which Bloom accepts) will not only serve that purpose but could also result in a workable verification mechanism for the Program as a whole.

In that regard, I want to hereby introduce Bill Brockenborough, who was recently hired by Bloom to manage our SGIP and gas contracting processes. Bill has experience in both areas, and Josh Richman has suggested that Bill meet with each of the Program Administrators (as he did recently with [Redacted] and his PG&E colleagues). Accordingly, Bill will be contacting you and each of the other Administrators directly to arrange that.

In the interim, please contact me if you have any questions. Regards – Marty Collins

Subject: SGIP Program Administrator's Letter to Bloom Energy - Directed BioGas Attestation documents issue

Mr. Collins:

Attached for your action is a letter jointly approved by the 4 SGIP Program Administrators in the matter of the "Directed Biogas Fuel Supplier Attestation" documents, that were submitted earlier this year by Bloom Energy as part of the various Fuel Cell Project Reservation Request Applications.

The Program Administrators are excited to work with you to move ahead so that all of these customer fuel cell projects can proceed and help us achieve our collective SGIP Program goals. Please let us know if you have any questions on this matter.

Sincerely

Gary Barsley
