Subject: Questions from Yesterday

Tom there's also a question we want to ask in a less-public way, since it's backward-looking and part of the investigation:

8) Please explain in detail the actions PG&E took in closing the valves on the affected segment of Line 132 on the evening of September 9, 2010, including a timeline showing precisely when PG&E became aware of the rupture and when each of the valves, upstream and downstream, was closed.

I won't do it in this letter (which will be public), but will follow up with it somehow later today.
