Raffy

As you know from my previous email, the team has been called away to answer NTSB questions. I expect them to be finished some time tomorrow but, at this point, that is only a guess.

Right now, all I have is the un-updated, un-annotated Top 100 list with no project descriptions or maps. Also, I noted a couple of errors in the attached list. I will get you provide an errata copy of the list along with the descriptions and maps as soon as possible after completion of the NTSB work.

Thanks for your patience.

Subject: Request for Data

Chuck,

As we discussed on the phone this afternoon, please provide me, within 24 hours, a list of the "top 100 highest risk line sections in the 2007 Risk Calc" (as referenced in the justification for the replacement of 7481 feet of transmission line 132 with 24" pipe).

Thanks.
