San Bruno Media Update

Tuesday, September 21, 2010

2:00 p.m.

Summary

This morning, media outlets continued to report on PG&E's release of its long-term project planning list, usually localizing the story with information about pipelines in the local markets. The San Francisco Appeal noted that both Senator Leland Yee and Assemblyman Jerry Hill applauded the release of the list, while calling for increased transparency and information from state utilities. Also of note, The Stanford Report published an informative Q&A from the campus's Office of Environmental Health and Safety about local pipeline information.

Developments to Date

- Local news outlets continued to report on PG&E's release of its long-term project planning list
- Stanford University's newspaper published an informative Q&A from the university's Office of Environmental Health and Safety regarding campus safety associated with nearby

pipelines

Silicon Valley/San Jose Business Journal

PG&E posts 100 riskiest Bay Area gas pipes

By Cromwell Schubarth

September 21, 2010

Pacific Gas & Electric Co. on Monday posted a list of the 100 riskiest natural gas pipeline segments in the Bay Area and their locations.

Eleven are in Silicon Valley. One of those is near Highway 237 and Ranch Drive on the San Jose-Milpitas

San Francisco Appeal

Assemblyman Hill: PG&E Pipe List “a little sketchy and wanting”

By Appeal Staff

September 21, 2010

As part of PG&E's efforts to restore public trust in the company following the deadly natural gas pipeline explosion in San Bruno, PG&E officials released a list today of the company's 100 riskiest sections of gas pipeline.

PG&E engineers use the list to plan future preventive maintenance and monitoring, PG&E president Christopher Johns said at a news conference in San Francisco.

The Washington Independent

PG&E Releases Pipeline Locations and Monitoring Priorities

By Andrew Restuccia

September 21, 2010

PG&E, the owner of the natural gas pipeline in San Bruno, Calif., that burst earlier this month killing four people and destroying dozens of homes, released yesterday for the first time maps of the locations of its pipelines.

Stanford Report

Stanford officials in discussions with PG&E to address concerns about gas transmission pipelines near campus

By Stanford Report Staff

September 21, 2010

The recent gas pipeline explosion in San Bruno has understandably increased concerns over the status of natural gas transmission lines near Stanford University. On Monday, Stanford was notified by PG&E that a section of pipeline that runs along Juniper Serra Boulevard is on the PG&E "Top 100" list. The list is one of PG&E's protective maintenance and risk management planning tools used by engineers to focus resources and plan for enhanced monitoring or future work on gas transmission pipelines. Stanford utilities personnel continue to communicate with PG&E on issues related to gas lines near Stanford and also are attempting to determine when inspections of these lines will be finished, as PG&E is under a directive to complete inspection of all their pipelines by Oct. 12. In the following Q&A, Larry Gibbs, associate vice provost for Environmental Health and Safety, provides further information.
