Subject: RE: Community Meeting in Fairfax

Hello,

yes, that would be great. I have the smart
grid cyber security/privacy workshop on 9/29 during the day, but my
night is free and I would be happy to join you. Let me know the details -
address and time. I'll bring the input from the PUC's side and where smart
meters fit into our overall policy.

NOTE - there's no attachment to your email below. You
said in the email below that their questions are attached.

regards,

marzia

Subject: Community
Meeting in Fairfax

Marzia,

I hope this note finds you
well. When we last met up in Sacramento you expressed some interest in

coming along with us to some of the community meetings that we are having as
part of trying to improve the degree and pro-activeness of our community outreach. As such, we have
been working with the Town of Fairfax on a plan to addressing the
community's concerns. That included a session last week where PG&E was simply
invited to listen to the community's concerns. That session
lasted more than two hours and resulted in the questions that
are attached. Our follow-up session with the community is scheduled for 9/29
where plan to cover the basics of SM deployment and RF issues. We
anticipate that there will be a second session subsequently to
cover other related issues such as privacy.

We would like to see if you
are available to join us that evening as part of our discussion. We will lead
the discussion, but hope to have a panel that you would join for questions,
along with some outside RF experts.

Let
me know what you think.

Thanks,

Bill
