> Kirk et al - I received a call from Paul Clanon regarding the sudden drop in temperatures. Paul and the Commissioners are concerned that the cold weather may lead to curtailment of the gas system on the Peninsula. I told Paul that I thought we were well above the temperatures that might necessitate any type of curtailment. Paul asked that I confirm that observation with our operational executives. Can one of give me assurance ASAP for the rest of the day and into and early morning hours of Monday that the curtailment risk is de minimus? Thanks.
