Thanks Don! I could picture the faces, but I wasn't taking down the names as quickly,
Jane

Jane/Amrit/Bruce,

The other attendees at the meeting this week from Energy Division were Elaine Lau (ec2@cpuc.ca.gov), Richard Myers (ram...), and Greg Wilson (gaw...). I have forwarded the info provided this morning to them.

I see that Gurbux just asked for more info.
Thanks,
-Don

<<Expense and Capital to Energy Div update.xls>>

Julie, Gurbux, Eugene, Don, Steve, and others (I apologize that I did not get email addresses for everyone who attended the meeting) --

Thank you for taking the time to meet with us on Tuesday to discuss PG&E's expense and capital expenditure spending since 2003. Attached is a softcopy of the data that we provided to you. We have also included, at your request, two tabs entitled "Definitions" (which defines what data is included in each line of business) and "Decision" (which lists the rate case decisions covered for the data time period). In addition, we have corrected two formula/computational errors. One is on the "Summary Report" and corrects the variance for 2005 expense. The other correction is on the "Gen" detail page, and corrects the DCP (Diablo Canyon Power Plant) variance amounts.

Gurbux: we are also working on your request to break-out the A&G that is embedded in the Lines of Business (e.g. electric distribution) and will provide that once it's completed.

Please let me know if you have any questions in the meantime,

Jane
