Subject: LMT strategies meeting

When: Tuesday, October 26, 2010 10:00 AM-3:00 PM (GMT-08:00) Pacific Time (US & Canada).

Where: TBA

Note: The GMT offset above does not reflect daylight saving time adjustments.

~~*~*~*~*~*~*~*~*

The CPUC is taking the lead in arranging two meetings and one conference call within the next two months to focus on the plans and technology list requested of the investor-owned utilities' (IOU) 2010-2012 Lighting Market Transformation (LMT) Program. This is the first of those two meetings.

Context: The overarching purpose of these meetings and conference call is to continue the collaborative process of helping the IOUs achieve their LMT Program goals within the context of the Strategic Plan's new Lighting Chapter. The CPUC will be developing draft templates/guidelines for the Pilot Project Plans and LMT Pipeline Plans that the IOUs are required to develop per the Commission Decision Approving 2010-12 Programs.

Strategy Meeting

Objectives:

- Obtain feedback on draft templates/guidelines for Pilot Project Plans and LMT Pipeline Plans

- Obtain agreement regarding the order in which LMT Pipeline Plans will be developed for the technologies/applications identified in the LMT Program Implementation Plan (PIP);
- Obtain agreement on the number of draft Pilot Project Plans and LMT Pipeline Plans to be presented by the IOUs during the Collaborative Workshop

This meeting is focused on the project plan and pipeline plan templates called for in the decision. While this is an IOU responsibility, the CPUC is setting up this meeting to help ensure the development and finalization of these templates so other aspects of the program can move forward.

The goal is that between the two meetings, the IOUs will be able to populate and finalize these templates to the best of their ability at this point in time.

The intention of setting aside this time is to assist the utilities in development of the required pilot and pipeline plans as indicated in the decision language below (D.09-09-024, p.141).

For these reasons, we direct that the utilities submit, at a minimum, the following information on an annual basis:

- Annual plans for lighting solutions to be implemented in each key market segment (residential, commercial, industrial, agriculture and exterior lighting).
- A prioritized list of key lighting technologies, systems and strategies that require LMT pipeline plans.
- New or revised LMT pipeline plans for key lighting technologies with plans based on market data. LMT pipeline plans will identify funding, partnerships and needed coordination with the following Commission efforts: Workforce Education and Training, Codes and Standards, DSM Coordination and Integration, Marketing, Education and Outreach, Research and Technology and Local Governments.
- Status update on the design and development of at least one LMT pilot project for each market segment (residential, commercial, industrial, agriculture and exterior lighting). Each pilot should be used as a vehicle to test new technology and program delivery mechanisms. Status update should include information on each pilot and collaboration with other utility programs and public and private partnerships.

The utilities shall submit the above Statewide LMT Program information in a Report by June 1 of each year (beginning in 2010).

To my knowledge, no exception to these annual submission requirements have been made, but please correct me if this is the case. I'm available by phone till 2, and again after 3. Please call me if you'd like to discuss further.
