Subject: Proposed dates for metrics webinars

All:

Thank you for meeting the deadline for sending out your list of proposed Smart Grid metrics. I would like to propose the following schedule for webinars.

Friday, October 8, 10:30 AM to Noon: Customer/AMI (Metrics 1-9)

Tuesday, October 12, 10:30 AM to Noon: Grid Ops, including storage (Metrics 11-21)

Wednesday, October 13, 11:00 AM to Noon: Cyber-Security and related issues

Friday, October 15, 10:30 AM to Noon: EVs, Environment and Future Considerations/Issues (Metric 10)

I am not wedded to the topics on those specific dates, if people needed to discuss the topic are unavailable on those days. I'd rather not push too many back into the week of October 18, primarily because that is GridWeek and I know that many people will likely be out there, but if there is a call for it, then we can work it out. Additionally, I will try to provide some initial questions in advance of the webinars to the utilities to help the process move along.

I would also like to address the schedule for meeting with PUC, CEC and CAISO staff on the status of deployment plans and a briefing on cyber-security policies and processes. We have a meeting scheduled with SDG&E for next Monday. PG&E has requested that their meeting be pushed back until the week of October 25. If SCE would like to have their meeting the week of the 25th, then that would be fine as well. Our workshops on customer access are scheduled for October 25-26, so the open days are currently October 27-29. I imagine an hour or so on deployment plan status and 2 hours on cyber-security.

Thank you again everyone for your help and work on this. Please do not hesitate to give me a call if you have any questions or concerns.

Chris
