Because I was out of the office last week, its taken a bit longer than expected to get this back to you. I don't think its particularly time sensitive at this point as a status report memorializing the process. But, it would be good to wrap it up and move forward with everything else we need to do.

From ED's perspective, the attached doc is pretty much ready to go subject to any final edits from the IOUs. Let us know if you'd like to schedule time next week to meet to discuss. Otherwise, we can just finalize the doc via email, and send it to the ALJ and assigned Commissioner when its ready.

Subject: RE: Non-DEER Review Group Meeting- Wednesday April 28, 2010, 3:30-5:00 PM

I'm sorry if there was an expectation that we have a meeting today. I thought we decided on the last call that we would not schedule another group meeting until ED had a revised draft ready to review.

We would like to wrap this up as soon as we can, but there is less urgency to finalizing a status report document. Please don't expect any meetings on the doc until we can carve out time on our end to edit it. It may not be this week given all the other deliverables going out.

Subject: Re: Today's non-DEER review meeting moved to Friday

Peter,

As a follow-up from Monday's meeting, we have made the following types of changes to the document:

1. Clarified what is the utilities point of view in various places ("Utility's Opinion")
2. Clarified the agreement from the April 9th meeting by adding on sentence of clarification and dropping the two sections that were problematic.
3. Added a reference to the analysis for the likely DOE2 impacts (SCE values) and an appendix with that explanation.
4. Provided some minor edits to the custom document and other items throughout.

All the changes were highlighted in yellow so they can be reviewed quickly.

We'd like to discuss in the meeting today.
