Subject: PG&E New non-DEER Deemed Product Work Papers

Zenaida Tapawan-Conway and Peter Lai:

As you know, Energy Division's practices for submittal, review, and 'freezing' of Utility developed non-DEER ex ante energy efficiency measures have been clarified as a result of the Commission's process for addressing the Utilities September 17, 2010 petition for Modification of Decision 09-09-047.

Timely approval of work papers is essential to PG&E's effort to manage its Energy Efficiency portfolio in a cost effective manner.

This email is to confirm that the PG&E new non-DEER deemed product work papers listed below are approved by the Energy Division pursuant to the November 18, 2009 ALJ Ruling Regarding Non-DEER Measure Ex Ante Values. In that Ruling, practices and procedures provided to the Utilities by Energy Division on November 3, 2009 with requirements for submittal, review and freezing of Utility developed non-DEER ex ante energy efficiency measures were attached to and approved with the ruling.

The work papers listed below were posted to the Energy Division Basecamp website on August 12, 2010 by PG&E. As PG&E has not received a response regarding these specific work papers we consider them approved per the November 18, 2009 ALJ ruling. This ruling states that, "all preliminary reviews will be completed within 15 days of work paper submission."¹ It also states, "ED will notify the utility and request for the work paper to be resubmitted"¹ if there is any missing information. Given that it has been more than 15 days since the submittal of these work papers and that we have received no request for additional information, PG&E must consider these work papers accepted.

The work papers are:

Consumer Notebook Computers Revision 0 (PGECOCOM108 R0)

Business Notebook Computers Revision 0 (PGECOCOM109 R0)

Business Printers and Multifunction Devices Revision 0 (PGECOCOM110 R0)

Sincerely,

Redacted

PG&E

Principal, IDSM Energy Efficiency Statewide Lead
