Meredith,

Energy Division grants the extension request. I would like to have a conference call with PG&E to discuss this data request. Are you and the staff person that will be working on the data request available today at 4:30?

Regards,
Sean

Sean A. Simon | Energy Division - Analyst | CA Public Utilities Commission | Tel (415) 703-3791

Sean,

As we discussed, given the holiday, PG&E requests an extension to Friday, Dec. 3 to respond to this request.

Hope you had a great Thanksgiving!

Meredith

PG&E,

Please submit an updated response to this data request using the same excel file on Wednesday, December 1 that does the following:

- Accurately reports all executed contracts (even if the AL hasn't been filed yet) (e.g., are the Agri Waste and Covanta Oroville contracts included here?)
- Accurately reports the contract status for all contracts (several 2010 contracts that have been filed are shown as under negotiation)
- Includes all contracts in active negotiation from the RPS solicitations (e.g., Tier 1 contracts?)
- Includes all bilateral negotiations in active negotiations (e.g., October 8, 2010 PRG presentation)
- Include project viability scores for all projects added per this data request

Contact me directly if you have any questions.

Regards,
Sean

Subject: Energy Division Data Request_RPS Portfolio Analysis

PG&E,

Please respond to this two-part data request from Energy Division staff by November 22, 2010. Any questions concerning this data request should be directed to Sean Simon at svn@cpuc.ca.gov or 415-703-3791.

A. PG&E RPS Portfolio Analysis

The spreadsheet is based on the RPS compliance reporting template. Please input the requested information in yellow cells, as PG&E customarily does for its biannual RPS compliance filing. One additional column has been added to the spreadsheet to collect project specific Project Viability Calculator scores. See Procurement Detail tab, Column X "PVC Score."

B. Current Net Market Valuation for Pending Contracts

For all pending contracts, please update the Net Market Value using a single current forecast for the "Levelized Energy Value." Also, update any other information, as necessary, to provide a current and accurate Net Market Value for each pending contract. For any contract with pricing provisions that establish a range of potential prices where the total costs may increase or decrease by 5% or more, identify an "expected" and "maximum" Levelized TOD-Adjusted Price and corresponding Net Market Value. Please provide the information in the following table format.

Contract/Project	Levelized TOD-Adjusted Price	Levelized Energy Value	Levelized Capacity Value	Transmission Adder	Net Market Value
Contract A					
Contract B					

Regards,
Sean
