Subject: RE: DRA/TURN request for information

Hi All,

It seems SCE and Sempra both agree there are no confidential information in its workpapers; however, I agree with Sempra that we should error on the side of caution. So, please take a couple of days to check for me, and let me know.

Thank you.

Peter

Subject: RE: DRA/TURN request for information

Importance: High

Hi, Peter!

I believe you are correct that SDG&E and SoCalGas do not have confidential information submitted in our current workpapers or early ED opinion requests.

However, as a cautionary recommendation, not knowing the duration of allowing DRA and TURN access to Basecamp and the full content of Basecamp now and in the future—Should DRA be given access under the “General Order 66-C and PU Code Section 583” and TURN be made to sign an NDA with each of the IOUs to be on the conservative side. This is particularly important given the short timeframe we have to respond to the request.

Thanks!

Happy Thanksgiving to you!

Subject: DRA/TURN request for information

Hi All,

Energy Division received the below data request from DRA and TURN. Please let me know if there might be any information in the utility workpapers submitted on Basecamp for Phase 1 non-DEER review that are considered confidential. If yes, please list for me those particular workpapers and what info/data I will need to scrub out before providing to DRA and TURN. I do not recall seeing any customer specific information in those workpapers. If I do not hear back by Monday at 1:00 PM (Pacific Time), I will assume that there are no confidential information in those workpapers on Basecamp, and will provide DRA and TURN with access to those workpapers.

Thank you, and sorry for the short notice.

Peter

Subject: DRA/TURN request for information

Hi Peter and Zeny, DRA and TURN request access to the website where the Utilities' work papers (submitted for freezing ex ante) are posted, along with ED suggested revisions. We would appreciate it you could walk us through the work papers. If you have any information about the cost effectiveness of the 2010-2012 portfolios, once ED's suggested revisions are made, we request that as well, even if it's only estimates.

Thanks very much, Diana
