Subject: RE: Data Request: PG&E Strategy to Increase Capacity and Reduce Curtailments

Thanks.

I have passed it on.

Subject: Data Request: PG&E Strategy to Increase Capacity and Reduce Curtailments

Bill,

As per our phone conversation today, I would like to get information/status updates on the strategies and steps listed on the October 25, 2010 letter from PG&E's Brian Cherry to Paul Clannon (Page 4-3).

Please provide updates on the each of the bullet points listed on the letter, and responses to the following requests/questions:

1. Please provide details on the modifications made at the Milpitas terminal.
2. Which main line valve on L-132 will be closed to reduce the demand and flow on L-132? Where is this located in relation to the incident site?
3. Which distribution regulator stations is PG&E currently planning on manually operating?

Additionally, has PG&E reached an agreement with CAISO and Mirant regarding curtailing Potrero Power Plant's Unit 3 prior to other non-core customers?

I can certainly touch base with your group who will be working on the responses next week to provide any clarifications.

Thanks for your help today.
