Gas Control,

The MOP of Line 153 between [Redacted] has been further reduced to 336 psig effectively immediately. Over pressure protection valves at [Redacted] need to be set by Milpitas M&C today to 346 psig to protect the new MOP of the pipeline. SCADA HiHi alarm pressure set points for all data points along the pipeline need be set per our alarm policy at 339 psig.

The MOP of Line 131-30 between [Redacted] has been reduced to 476 psig effectively immediately. Over pressure protection valves at [Redacted] need to be set

by Milpitas M&C today to 486 psig to protect the new MOP of the pipeline. SCADA HiHi alarm pressure set points for all data points along the pipeline need be set per our alarm policy at 489 psig.

Please confirm back by replying to this email today once all over pressure protection valves and SCADA alarm set points have been reset.
