Subject: Norman Ross Burgess (Three Forks) Overview
Sean:

Here is some background on this deal, which we are targeting to file this Friday:

- Hydroelectric facility located in unincorporated Trinity County;
- Capacity is 1.625MW, expected generation 8 GWh/yr;
- The project has been under contract since 1984 and is an expiring QF; this bilateral transaction is intended to be a replacement PPA;
- Due to the facility's small size, already being in operation, and the "as-available" nature of the hydro resource, PG&E and the Seller have elected to use the form PPA included in PG&E's Electric Schedule E-SRG for small renewable generators under 1.5 MW. However, the non-modifiable terms in the PPA conform exactly to the "non-modifiable" terms set forth in D.07-11-025 and D.08-04-009, as modified by D.08-08-028;
- The Term of the PPA is 20 years; and
- The price of the PPA is \$102.51

Let me know if you have any additional questions.

Thanks,
