Rich,

I understand you had some questions regarding the other pipelines on which PG&E has applied its practice of reestablishing MAOP every 5 years as suggested in this morning's Chronicle article. At Kirk's request, I've attached to this e-mail some information PG&E provided to the NTSB on Wednesday, January 12, 2011 in response to NTSB Data Request 036-005 . I understand a concurrent copy of this information was provided to your staff at that same time. This information should address the questions you had for Kirk this morning. If you have any questions about it, please let us know.

Thanks,
Trina
