Subject: Meeting Tomorrow Instead ?

Paul - can we meet tomorrow ? We received Jerry Hill's letter asking to give him documentation by February 1 on pipelines that have seen increases in pressures to MAOP. We are fine with that. In the interim, we are working feverishly to get the data we need to complete that. However, I'd like to walk you (and staff) through a primer on how pressure are established and how measurements are made vs. MAOP that I'm told is very revealing. I'd like to do that sooner than later since I leave for Hawaii Saturday !. Thx
