Subject: Re: Overpressure Event Mtg Monday at 10:00?
Ok.

Paul, Rich and Julie,

I'd like to suggest we meet with you and your staff **tomorrow at 10:00 a.m. at the CPUC regarding overpressure events on PG&E's gas transmission system**. At that meeting we should be able to answer the questions that Rich raised earlier today with Kirk about those events, identify remaining questions to be quickly answered, and review PG&E's preliminary analysis and recommendations regarding those line segments. Does that time work for you? If so, I suggest allocating at least 1.5 hours for this discussion. **Please let me know if 10:00 works for you.**

I understand that a couple of CPSD engineers are also planning to come out to the field to look at the documents underlying PG&E's analysis of these lines/events. I am coordinating with Julie offline to make sure those folks go to the right place.

Thanks,

Trina
