Subject: RE: Data Requests; Request to use a single mailbox

Sounds fine to me. I am getting confused myself with the myriad filings that come and go. Centralizing seems efficient.

Julie

Rich and Julie, any thoughts for Bill on this?

Subject: Data Requests; Request to use a single mailbox

Paul:

We have been getting San Bruno related data requests from a number of different sources at the CPUC. That of course is not an issue, but they are being sent to PG&E through a number of different entry points and that is causing some confusion, delay and in some cases redundant work. It would be useful if all of the requests came in to a common mailbox where the requests can be efficiently processed. The CPUC's use of the centralized electronic mailbox will help PG&E better track the requests, thereby promoting timely, accurate and complete responses.

We have put together a letter to you asking that the CPUC to use that mailbox. Before we send that letter to you I wanted to make sure that you are OK with the concept and with who we have cc: 'd. I can send you a draft of the letter if you would like. Call me on my cell phone if you would like to discuss this further.

Thanks.

Bill
