QUESTION 22

What is required to provide customers with a reading of gas usage every day, even if the usage that day is less than 1 therm?

ANSWER 22

PG&E will be transmitting daily gas usage to the web presentment vendor, so that customers may see intra-bill gas usage. For customers with less than one therm of usage, PG&E does not believe there is added value to augmenting the current web presentment as it already displays up to two decimal points of granularity when a customer holds a mouse over the bars in the graphs.
