QUESTION 16

Provide the cost of any and all equipment related to deployment of electric meters that use an Aclara communication system.

ANSWER 16

To ensure consistent usage, PG&E assumes the reference in this data request to "Aclara" electric meters and communications systems references "Hexagram-Electric" meters and communications systems.

As shown in Attachment DRA_001-16-1, in the column titled "Total Material Cost," the estimated cost of equipment related to the deployment of electric meters that use a Hexagram-Electric communication system is \$21,295,960.
