Subject: Community meeting on smart meters

Hi Felecia,

I got a call from a Karen Huggins yesterday asking the PUC to attend and participate in a Q&A session on why smart meters, etc. The town hall meeting is tonight at 6pm at 100 Appleton Ave here in San Francisco. She said that she is expecting over 100 residents to attend as well as their Supervisor, David Compos to be there and speak. (please note that it may just be 5 people there, and no Supervisor).

Anyway, let me know if PG&E is planning to attend. Ms Huggins mentioned during the phone conversation that she called PG&E and PG&E told her to call the PUC.

I'm also copying Cliff to this email as I spoke with him this morning; he came to my house :-). I have a smart meter and a motion light interference that is hopefully now resolved.

regards,
marzia
