Subject: PG&E's RPS position and strategy

Meredith,

Following up on our conversation about PG&E's RPS position and strategy. I think people here will be interested in the following information:

- RPS Position

- o current and historic (report past deficits and surplus; compliance position with flexible compliance)

- Portfolio Analysis

- o what are the portfolio characteristics: cost, risk (e.g., project a & b may fail) and time (e.g., project a & b may be delayed x-number of years)

- o please include some detailed information about cost

- RPS Need

- o approximate net short and in what years

- Strategy for Meeting RPS Need

- o specific resources (e.g., baseload vs. intermittent peaking)

- o specific contract types (e.g., short-term vs. long-term)

- o specific programs (e.g., RPS vs. RAM)

Regards,

Sean
