

FINAL

**CALIFORNIA ENERGY COMMISSION  
DEMAND ANALYSIS WORKING GROUP (DAWG)**

**January 20, 2011**

**Hearing Room B  
California Energy Commission  
1516 Ninth Street  
Sacramento, CA 95814**

**Dial-In: 866-740-1260  
Participant code: 5859653#**

**AGENDA**

Discuss topics related to energy savings, including Publicly Owned Utility energy efficiency EM&V progress, and energy efficiency in the forecasts.

**10:00 Welcome and Introductions**

**10:10 Subgroup Roundup (Discussion of Subgroup Activities to date, and other relevant information in their topic areas.)**

- Demand Forecasting Subgroup – Kavalec
  - DAWG Demand Forecasting Subgroup – Kavalec
  - 2011 Integrated Energy Policy Report IEPR Status -- Kavalec  
[http://www.energy.ca.gov/2011\\_energypolicy/index.html](http://www.energy.ca.gov/2011_energypolicy/index.html)
  - Long Term Procurement Proceeding – Skinner  
<http://www.cpuc.ca.gov/PUC/energy/Procurement/LTPP/LTPP2010/>
- Energy Savings Subgroup – Best/Lewis
  - DAWG Energy Savings Subgroup – Best/Lewis
  - Status of CPUC 2010-2012 Evaluation Measurement & Verification <http://www.calmac.org/toolkitEE.asp>
  - CPUC Energy Efficiency Potential and Goals studies -- Mackin

**11:00 Status of EM&V in CA Public Owned Utilities -- Lewis**

[http://www.energy.ca.gov/2010\\_energypolicy/documents/index.html](http://www.energy.ca.gov/2010_energypolicy/documents/index.html)

for the full report, and

<http://www.energy.ca.gov/2010publications/CEC-200-2010-008/CEC-200-2010-008.PDF>

for just the POU energy efficiency EM&V portion of the report.

**12:00 Lunch**

**1:00 Select Topics on Energy Efficiency – Energy Savings Subgroup Members**

Note that this is a *working session*. The ES Pup has been working on these topics and would like to discuss them with the full DAWG. We are not planning to present finished products but rather to let the DAWG know what topics we've been discussing, what we have learned thus far, and to seek additional input.

- Historic energy efficiency in California – summing up
- Energy Efficiency in the IEPR Forecast
  - How historic accomplishments are reflected in the forecast

- Implications of different approaches to historic accomplishments
- Descriptions of the “buckets” in the demand forecast (e.g., state and federal codes/standards, utility programs, naturally occurring conservation, committed/uncommitted, etc.)
- Total Market Gross efficiency – rationale and description
- Naturally Occurring Conservation
- Energy Efficiency Savings Decay
