Subject: PG&E's Accelerated Leak Survey Trends Report

[Redacted]

Paul:

In your letter to PG&E dated September 13, 2010 (Item 3), and in the Commission's Resolution L-403 adopted on September 23, 2010 (Ordering Paragraph 12), PG&E was directed to conduct an accelerated system survey of all natural gas transmission pipelines, giving priority to segments in Class 3 and Class 4 locations.

On October 25, 2010, PG&E provided the Commission with its Initial Report on its Accelerated Gas Transmission Leak Survey ("Accelerated Leak Survey"). PG&E completed the Accelerated Leak Survey on November 19, 2010. Attached is PG&E's report, which provides an update on Grade 1 leaks discovered and repaired immediately during the survey, identifies transmission leaks repaired as of November 30, 2010, evaluates the trends associated with those leaks, and presents PG&E's analysis and recommendations based upon the survey results.
