Subject: RE: I signed the letter.

We have a problem.....the first sentence was changed from, "...of all segments of the following transmission lines located in HCAs..." to "...of the following transmission lines that have segments located in HCAs..." The second sentence is causing angst for two reasons. First, it is more broad and goes beyond the segment to the entire transmission line. I don't think that is your intent but that is how it is being interpreted. Assuming that isn't your intent, perhaps you could send me a note clarifying that. The second is more problematical. Last night, Transwestern over-delivered into our system at the border and it exceeded MAOP by 10%. Using the new language in the official letter, we would interpret that to mean that we need to immediately take down line 300 all the way from the border - creating a big problem. Why they didn't tell me this in the morning is beyond me. Help....
