**Subject:** santa cruz letter re interference

Hello Cliff:

The attached letter from Santa Cruz re RF interference has just been brought to my attention, although it is several months old. I believe PG&E has acknowledged the possibility of interference. The Commission would still like to send a formal response to the municipality.

To help formulate the response, we would like to understand how PG&E has responded to and handled these situations to date and how frequently has this problem been encountered (approximate summary data over the last year would be fine, for example). Thanks.

**Alope Gupta**
