Subject: santa cruz letter re interference

Hello Cliff:

The attached letter from Santa Cruz re RF interference has just been brought to my attention, although it is several months old. I believe PG&E has acknowledged the possibility of interference. The Commission would still like to send a formal response to the municipality.

To help formulate the response, we would like to understand how PG&E has responded to and handled

these situations to date and how frequently has this problem been encountered (approximate summary data over the last year would be fine, for example). Thanks.

Aloke Gupta
