Subject: RE: PG&E Data Response - AL 3741-E - *Confidential - Protected Under Decision 06-06-066 and Decision 08-04-023*

[Redac] thanks for your response. Our team has a few follow-up questions which I have included below. Please follow-up with me if you have any questions.

Thanks

[Redacte]

1. In the advice letter AL 3741-E on page 8, PG&E states that [Redacted] [Redacted] Please provide information on the other bilaterals being offered to PG&E, such as resource type, project size, price, net market value, project viability score and any other information that will help us in our evaluation process.
2. What information does PG&E feel is permissible in the answer to data request question 1 to be included in the public section of the draft resolution?
3. With respect to PG&E's answer to question 7 in the data request PG&E commented [Redacted] Can you please provide references to the public statements that SCE relied upon to conclude there is no need for expansion of transmission capacity from Palo Verde/Hassayampa into California.
4. In the request for interconnection by Sempra Generation to CAISO dated July 29, 2010, Sempra Generation comments "Because the new switchyard will be a CAISO network

facility, its cost (likely over \$30 million) ultimately will be borne by California power customers.” If Sempra Generation receives approval from the CAISO for interconnection as a Pseudo-Participating Generator, Sempra comments in the same letter that it will construct a 500-kV switchyard as part of an interconnection requirement to qualify as a Participating Generator. In this scenario, given PG&E’s knowledge of the various interconnection options, under what process will California power customers be responsible for the cost of the 500-kV switchyard?

Confidential - Protected Under Decision 06-06-066 and Decision 08-04-023

Sean,

Please find attached PG&E's confidential responses to Energy Division's data request sent January 25, 2011, concerning additional information for Advice Letter 3741-E, PG&E's power purchase agreement with SGS-1. Also attached is a confidentiality declaration and matrix, as well as the original data request itself.

Please contact me if you have any questions.

Thank you.
