Subject: RE: PG&E Data Response - AL 3741-E - *Confidential - Protected Under Decision 06-06-066 and Decision 08-04-023*

PG&E,

The purpose of this email is to clarify any misunderstanding regarding data requests for PG&E's advice letter 3741-E.

Please provide least-cost, best-fit (LCBF) evaluation for all bilateral offers under consideration during the pendency of PG&E's negotiations with Sempra Mesquite by Friday, March 4. Once PG&E submits this information, staff will resume work on the draft resolution. Staff are available to discuss this request, if necessary.

The purpose of LCBF evaluation is to ensure that the utility is contracting with the best offers available, whether through an RFO or bilateral negotiation. To the that end, PG&E states in the LCBF section of AL 3741-E that, "PG&E examined the reasonableness of the PPA using the same comparison tools that are used for RPS offers received in the 2009 RPS Solicitation and with other bilaterals currently being offered to PG&E." Through several data requests, Energy Division staff has attempted to obtain data that was not included in the advice letter, namely the "other bilaterals currently being offered to PG&E."

The information PG&E provided in this most recent data response, specifically the modified version of the August PDSR, does not provide the information needed to verify whether PG&E's decision to execute the Sempra contract meets the LCBF requirements. For example, price information is not included in the data. Also, it doesn't appear to be a comprehensive list of bilateral offers based on recent PRG presentations (e.g., see August and December 2010 PRG presentations).

In the future, for all advice letters please provide LCBF evaluation values, including but not limited to, price, resource adequacy value and project viability for all bilateral offers PG&E is considering at the time the advice letter is filed. PG&E should modify the advice letter template's bid analysis work papers as needed to provide this information.

Regards,

Sean

Thanks for your response. Can you please provide some additional clarity per the questions below. My apologies for giving you the wrong (re: question 1) info per our phone conversation a couple of weeks ago. Hopefully we are both near the end of the evaluation process on this project.

Cheers,

Jason
