Re: Supplemental Report to Application A.10-01-022, "Application of Pacific Gas and Electric Company to Recover the Costs Associated with Renewal of the Diablo Canyon Power Plant Operating Licenses"

Dear Mr. Clanon:

PG&E is providing Commission staff with a copy of a report entitled "Methodology for Probabilistic Tsunami Hazard Analysis: Trial Application for the Diablo Canyon Power Plant Site," as a supplement to Application A.10-01-022, "Application of Pacific Gas and Electric Company to Recover the Costs Associated with Renewal of the Diablo Canyon Power Plant Operating Licenses." Several reports were discussed in the prepared testimony supporting PG&E's application in response to the California Energy Commission's (CEC) AB 1632 Report Recommendations on Diablo Canyon.

On April 13, 2010, PG&E submitted three reports, and indicated that it was still completing two other studies recommended in the CEC's AB 1632 Report. Those studies would be submitted to the Commission when they were finalized. This report is the first of the two remaining studies. PG&E will submit the second study once it is finalized.

If you have any questions regarding this letter and the reports, please contact Jennifer Post at (415) 973-9809 or Bonnie W. Tam at (415) 972-5509.

Sincerely,

Brian K. Cherry
VP, Regulatory Relations
