Gregg - can you help me with this water company ? Rami is Division Director of Water at the PUC and claims our inability to restore electricity will result in a water crisis for the community of Oakhurst. Could you have someone run this down ASAP ? Thx.

Brian:

I need your help.

I received a call from [Redacted] today. They have been without power since Sunday evening. They expect to be out of water by Wednesday afternoon unless power is restored. They have been unsuccessful in getting any information regarding that from the local PG&E office.

[Redacted] is the primary water supplier for the community of Oakhurst.

Do you have a contact for me?

Thanks

Rami
