Subject: Re: Reporter Question

The reporter says that PG&E called him back and said they completed the project. We wouldn't have had to approve it?

The reporter says PG&E replaced pipe within about 10 houses of where it blew up, but didn't go to that spot.

Hi Terrie - We would not have approved the project. He'll need to ask PG&E, or we can data request the info (which will take a few days).

Subject: Reporter Question

Hello,

The Mercury News is trying to find out today some information about Document 2-DW on the NTSB docket from the San Bruno pipeline accident. It's titled "1992 PG&E Geologic Hazard Evaluations" and it outlines plans by PG&E in 1993 to replace sections of line 132 and line 109 in San Bruno for seismic safety reasons. It's at:
<http://www.nts.gov/Dockets/PipeLine/DCA10MP008/460223.pdf>

Two questions:

- 1) Did the CPUC ever approve this project? If so, are details in documents online?
- 2) Did PG&E ever construct it?

Any idea how I'd find out?

Thanks,

Terrie
