Paul,  
I spoke with Karen and I think the issue's resolved. We'll keep the ISO informed of our progress going forward.  
Tom

Paul,  
Thanks for your note. I'll call her today.  
Tom

Tom, I'm not sure if this is in your area. Karen Edson from the ISO called to say they're having trouble getting a point of contact at PG&E for discussions about gas supply to power plants. They're suggesting I set up a meeting of PUC/ISO/PG&E and that might be fine (I'd probably include the CEC too), but it might be better for you guys to get with the ISO more directly to start.
