Subject: RE: 100

Hi Terrie, we're both perpetually playing catch-up. So what we decided to do is make an additional pass through the document to make triple sure that the all of the cities and other locations identified were correct. Brian sent over yesterday an updated Top 100 list to Paul with a summary of the locational updates made (in general, the changes were made to be more specific as to location, or to reflect a correction where a location is right on the border of two municipalities and we needed to correct for the right city, etc.). If you could put the revised T100 on the CPUC web site, that would be great -- that way if municipalities check it they will be properly identified. Call me w/ questions, and thanks for your patience. Thanks and be well,  
Trina

Hi Trina,

Sorry I didn't get back to you last week re: the 100 list! Do we need to change the document?

Thanks!

Terrie
