Subject: RE: Tomorrow's Filing

The entire filing in the docket will be public except for some employee names that will be redacted off of some sample pressure test documents embedded within the document.

We will be submitting separately, under 583, to CPSD in response to Rich's request several sets of 8 CDs containing scanned and indexed copies of every single document that underlies the numbers in the public filing. Most of those thousands of documents contain employee names that we need to redact before the docs become public but there is an assumption that the CPUC is likely to want to do that eventually. We will work to make those redactions but frankly just getting them sorted, labeled and clickable took all the time we had.

Also working on a map which - if we can finish it - will be public. It would show the locations where there is no documentation. The map is coming down to the wire.

Are you available to touch base re: pressure reduction thoughts today with some combo of Tom, Brian and me? I can't remember when you are back from Sac.

Trina

How much, if any, will be 583? I'll probably be asked at today's Assembly hearing how much will be available for the public to see.
