**MOTION OF PACIFIC GAS AND ELECTRIC COMPANY (U 39 M)
FOR LEAVE TO FILE CORRECTION TO COMMENTS ON
PROPOSED DECISION OF ALJ GAMSON**

Pursuant to California Public Utilities Commission (CPUC or Commission) Rule of Practice and Procedure 11.1 and 1.12, Pacific Gas and Electric Company (PG&E) hereby requests leave to file the attached corrections to its Comments, filed on March 14, 2011, on the Proposed *Decision Addressing Petition for Modification Of Decision 09-09-047*, issued by Administrative Law Judge (ALJ) David M. Gamson on February 21, 2011.

Specifically, on page 5 of PG&E's Comments, PG&E referred to the confidentiality requirements of Public Utilities Code Section 394.4(a). In fact, that statutory section is not applicable to PG&E. Instead, the correct reference should be to Public Utilities Code Section 8380. PG&E has made the appropriate corrections in the attached redline of its Comments.

While PG&E's erroneous citation does not affect the substantive arguments made in its Comments, PG&E believes the correction is not merely typographical in nature and that the erroneous citation could create confusion if included in the final decision in this matter.

PG&E appreciates the Commission's consideration of this requested correction.

Respectfully submitted,

ANN H. KIM

**COMMENTS OF PACIFIC GAS AND ELECTRIC COMPANY
(U 39 M) ON PROPOSED DECISION OF ALJ GAMSON**

Pursuant to California Public Utilities Commission (CPUC or Commission) Rule of Practice and Procedure 14.3, Pacific Gas and Electric Company (PG&E) hereby submits opening comments on the proposed *Decision Addressing Petition for Modification Of Decision 09-09-047*, issued by Administrative Law Judge (ALJ) David M. Gamson on February 21, 2011 (Proposed Decision or PD).

I. EXECUTIVE SUMMARY

In these Comments, PG&E addresses the benchmarking provisions in the PD. Specifically, the PD declines to modify previous direction to the Investor-Owned Utilities (IOUs) in Decision (D.) 09-09-047 that the IOUs must benchmark all commercial buildings, that numerical benchmarking targets shall remain in place, and that the IOUs should utilize multiple benchmarking tools. In concluding that benchmarking requirements in D.09-09-047 are adequate, the PD is factually or legally inaccurate for the following reasons:

- **Exclusive Use of the ENERGY STAR Portfolio Manager (ESPM) Tool** - In rejecting the Joint IOUs’^{1/} request that they be permitted to use the ESPM tool exclusively in order to align with the efforts of AB 1103, the PD concludes that the ESPM tool is not capable of benchmarking all buildings. This is incorrect. The PD also incorrectly concludes that other tools such as Building Energy Asset Rating System (BEARS) and the California rating system are currently available and can substitute for ESPM.
- **Numerical Targets** - The PD fails to acknowledge the practical effect of the IOUs’ inability to require all customers to participate in benchmarking. Nor does a proxy effectively address the following issues:
 1. **Benchmarking is Customer-Driven** -Benchmarking is a customer-driven process and customers can decline to participate. The PD’s conclusion that the IOUs can simply develop a proxy benchmarking system to bypass voluntary customer participation is erroneous as it assumes that the IOUs have access to all necessary information absent customer involvement, which is incorrect.
 2. **Customer Confidentiality** - The PD dismisses issues regarding compliance with statutory and Commission-imposed customer confidentiality requirements and states that those requirements are limited to the ESPM tool. That characterization of the scope of customer confidentiality requirements is legally incorrect. The PD also fails to acknowledge that customer confidentiality obligations would apply to the public release of data from a proxy as well. It is appropriate to resolve these issues in the context of AB 1103, where the CEC is currently examining them—not through ad hoc development of a proxy system that fails to address the core issue and which would detract from efforts to create a uniform benchmarking standard.

For these reasons, the Commission should correct the PD in accordance with Appendix A of these comments and should grant the relief sought in the PTM^{2/} including (1) authorizing the IOUs to exclusively use the ESPM tool for benchmarking; and (2) removing the requirement to benchmark “all” commercial buildings and other numerical benchmarking targets or otherwise reducing them to align with the Energy Efficiency Strategic Plan.

^{1/} The “Joint IOUs” refers to *Southern California Edison Company, Pacific Gas and Electric Company, Southern California Gas Company, and San Diego Gas & Electric Company.*

^{2/} *Southern California Edison Company (U 338-E), Pacific Gas and Electric Company (U 39-M), Southern California Gas Company (U 904-G) and San Diego Gas & Electric Company’s (U 902-M) Petition For Modification Of Decision 09-09-047, filed September 17, 2010 (PTM).*

B. The PD’s Rationale for Rejecting the IOUs’ Proposed Modification for Exclusive Use of the ESPM Benchmarking Tool is Factually Incorrect.

In declining the Joint IOUs’ request that the Commission authorize exclusive use the ESPM tool in order to align with the efforts of AB 1103, the PD references the Joint IOUs’ purported assertion that, if they were to use the tool exclusively, they could not benchmark all buildings.^{3/} This is factually incorrect. The Joint IOUs did not state that the ESPM tool contained some deficiency such that it could not be used to benchmark all buildings. The Joint IOUs merely pointed out that the process of benchmarking, in general, is driven by the customer, not by the IOU.^{4/} In other words, IOUs cannot require customers to benchmark their buildings.

The PD continues on to conclude that, “ESPM is a benchmarking tool which is widely available, but it is not a universally-applicable tool.”^{5/} This is also incorrect. ESPM is a universally-applicable benchmarking tool. Although not every building can receive a 1-100 percentile score, ESPM provides meaningful benchmarking metrics for all buildings, including weather-normalized source energy use intensity and greenhouse gas emissions data.^{6/}

Finally, the PD concludes that other tools such as BEARS and the California rating system are currently available and can substitute for ESPM.^{7/} This is also factually incorrect. Both the California rating tool and BEARS are in development by the CEC. Neither is currently complete or available. Further, the California rating system is meant to be used to supplement the ESPM, not in lieu of it.

^{3/} PD, p. 7.

^{4/} See Transcript of October 22, 2010 Prehearing Conference, pp. 335-336 (clarifying that the reasons why 100% benchmarking may not be able to be attained are not due to a deficiency in the ESPM tool, but rather, to the fact that benchmarking is a customer-driven process).

^{5/} PD, FoF 2.

^{6/} New construction buildings would be benchmarked when 12 months of operating data is available.

^{7/} PD, FoF 3.

The goal of benchmarking all buildings is consistent with the intent and ultimate result of AB 1103, which mandates ESPM as the only benchmarking tool for compliance. Supporting AB 1103 by promoting ESPM as the exclusive benchmarking tool is the best way for IOUs to achieve the goal of benchmarking: a standard or reference by which others can be measured or judged. To benchmark across multiple differing tools, or to create different standards through ad hoc proxies as suggested in the PD, defeats the very purpose of developing a uniform benchmark. For these reasons and because ESPM is currently the most widely used and developed tool, the Commission should authorize exclusive use of the ESPM tool to establish a credible and universally applicable benchmark.

C. The PD’s Conclusion that it is Feasible to Benchmark All Commercial Buildings Within the 2010-2012 Program Cycle is Factually Incorrect.

The PD states that “it is feasible to benchmark all commercial buildings in the 2010-2012 timeframe either through working with customers or by using customer data to develop benchmarking proxies.”^{8/} This is incorrect. In reaching this conclusion, the PD dismisses two legitimate issues raised by the Joint IOUs in their PFM: (1) recognition that the benchmarking process is customer-driven (i.e., IOUs cannot force customers to benchmark); and (2) customer confidentiality obligations pose obstacles to benchmarking some buildings.

1. The Benchmarking Process is Driven by the Customer.

Benchmarking is a customer-driven process, and customers can decline to participate. Therefore, if the Commission orders the IOUs to benchmark “all” commercial buildings that participate in EE programs, the Commission is essentially ordering the IOUs to do something that is beyond their control. The Commission has recognized this reality.^{9/} The Commission

^{8/} PD, FoF 4.

^{9/} PD, pp. 9-10 (“We do understand the concern of the IOUs that some customers, such as buildings with multiple tenants, may not consent to benchmark and release their energy usage data. By setting targets for benchmarking buildings in D.09-09-047, we have implicitly recognized that release of customer information cannot be forced upon customers.”).

also declined to require such customer participation as a prerequisite to energy efficiency program eligibility.^{10/}

That said, the PD dismisses the practical effect of the issue by concluding that the IOUs can simply develop a proxy to substitute for customers' voluntary participation. Inherent in the PD's proposal is the assumption that the IOUs have access to necessary data absent active customer participation. This is not always the case. Customers often hold necessary data that the IOUs do not have access to, such as square footage data and identification of distinct building characteristics.

2. Customer Confidentiality Obligations Interfere with the Mandate to Benchmark All Buildings.

State law and CPUC decisions mandate that ~~c[us]tomer~~ information shall be confidential unless the customer consents in writing. This shall encompass confidentiality of ~~customer specific billing, credit, or usage information~~ including financial information, name, account number, or residence of the customer.^{11/} ~~Thus the confidentiality directive protects customer information and only permits disclosure of generic or aggregated information regarding usage.~~^{12/}

The PD relies on two erroneous factual assertions and incorrectly dismisses the practical effect of these customer confidentiality requirements. First, the PD proposes that the IOUs develop a proxy to benchmark buildings in which customers decline to participate. However, the

^{10/} *Id.* at p. 9 (“DRA suggested that as a condition for getting incentives, the customer would be required to release information for benchmarking purposes. We do not agree with DRA’s suggestion; while the need for the utility to benchmark is important, customers’ willingness to release customer information should not preclude customer participation in all energy efficiency programs.”).

^{11/} Public Utilities Code § ~~394.4(a)~~; 8380; *see also* Pacific Gas and Electric Company Electric Rule 9.M; Pacific Gas and Electric Company Gas Rule 9.M.

^{12/} *See Id.*

PD fails to address the fact that the proxy data would also be subject to customer confidentiality protections and in most cases could not be released publicly absent customer consent.^{13/} Second, the PD erroneously claims that customer confidentiality protections apply only to use of the ESPM tool. This is also incorrect. Meaningful benchmarking requires analysis of customers' confidential data regardless of the tool used in the process. Therefore, regardless of whether a proxy is used (when customers decline to participate) and regardless of what tool is used to derive the benchmarking score, disclosure of such data is subject to confidentiality protections and presents the same issues with respect to tenant data privacy as raised in the PTM.

3. The PD Should Not Order the IOUs to Benchmark All Buildings.

PG&E supports the PD's intent that all commercial buildings should be benchmarked. However, mandating benchmarking of "all buildings" by the end of 2012, or otherwise setting a 50,000-building target for the end of 2012, fails to acknowledge the customer-driven nature of the process and the legitimate confidentiality issues discussed in the PTM and in these comments. In addition, the numeric targets set in D.09-09-047 are distinctly misaligned from the California Long Term Energy Efficiency Strategic Plan, which calls for a campaign to have 500 million square feet of commercial space pledged to be benchmarked by 2015.^{14/} That equates to the four IOUs combined benchmarking roughly 10,000 large buildings across the state by 2015.

^{13/} *See Id.*; *see also* PD at p. 10 (The Commission suggests that the IOUs should rely on customer-specific information such as energy usage data, building type, address, and square footage information to create such a proxy.).

^{14/} CA Long Term Energy Efficiency Strategic Plan January 2011 Update, p. 36, stating that the goals for 2009-2011 are as follows:

- Ensure all state-owned and leased buildings are benchmarked and retro-commissioned by 2012
- Conduct campaign to have 100 local governments commit to the same target
- Conduct campaign to have 500 million sq. ft of commercial space where owners/tenants pledge to reach the same target by 2015.

In declining to modify D.09-09-047 to include the proposed modification—that the IOUs are “encouraged” to meet benchmarking targets, or that such targets are “aspirational”—the PD relies on its stated conclusion that such language “implies a level of difficulty in meeting Commission goals which has not been proven.”^{15/} This conclusion is incorrect. In the PTM, the Joint IOUs clearly demonstrated that, while substantial benchmarking activity can be supported and achieved, there are very real issues that need to be addressed that currently prevent compliance with a mandate to benchmark all commercial buildings. Nor does the PD effectively resolve these issues. Therefore, the IOUs should not be ordered to do something by the Commission that is unattainable.

II. CONCLUSION

For the aforementioned reasons, the Commission should correct the Proposed Decision as set forth in Appendix A hereto and should grant the relief sought in the Petition for Modification, including: (1) authorizing the Joint IOUs to exclusively use the ESPM tool in benchmarking commercial buildings; (2) removing the requirement to benchmark “all” commercial buildings and other numerical benchmarking targets or otherwise reducing those targets to align with the California Long Term Energy Efficiency Strategic Plan.

^{15/} PD at p. 10.
