Gregg,

Below is the information that I sent to [Redacted] (Superintendent Restoration Support [Redacted]) to research on possible restoration timelines. I have reached out to [Redacted] with [Redacted] [Redacted] and received the information below. [Redacted] has set priorities based on his operational needs. Priority # 2 will be restored by 2000 tonight. Other priorities will be relayed to me by 1600. I will reach out to [Redacted] at that time and will discuss options at that time. Based on these location and what we currently know at this time, we are expecting restoration of all of [Redacted] facilities by Wednesday late PM.

I will keep everyone informed of next steps on this matter, after my conversations with [Redacted] at 1600.

Kevin,

I need the ETOR for each priority. I need to be the single contact for [Redacted]. [Redacted] can supply the physical locations for each meter listed.

Please provide me this information by 16:00 Today.

Brian,

[Redacted] Central Valley Region Emergency Center Lead, will contacted [Redacted] to provide an accurate restoration time or a generator to ensure they don't run out of water. He will provide us with an update.

Gregg

Gregg - can you help me with this water company ? Rami is Division Director of Water at the PUC and claims our inability to restore electricity will result in a water crisis for the community of [Redacted]. Could you have someone run this down ASAP ? Thx.

Brian:

I need your help.

I received a call from [Redacted] today. They have been without power since Sunday evening. They expect to be out of water by Wednesday afternoon unless power is restored. They have been unsuccessful in getting any information regarding that from the local PG&E office.

[Redacted] is the primary water supplier for the community of [Redacted]

Do you have a contact for me?

Thanks

Rami
