Return for changes or N/A		

I. General Checklist:

- Y Work Papers referenced prior to review?
- N New Asset Classes this month? (If so, notified Tax Department)
- N Book depreciation rates revised by May I Letter? (If so, revise book depreciation rates)
- Y Tax Depreciation Rates verified by Tax Department?

II. Factor verification:

- X ROR = 8.79%
- X Interest factor = 2.78%
- X Property Tax Rate (7/1/2008 - 6/30/2009) = 1.13481%

III. Spreadsheet control verification:

1. Access controls - limiting access of the spreadsheets to the appropriate individuals by saving them to a protected/restricted share drive that is backed up on a timely basis.

Each monthly RRQ model spreadsheet is located on a shared drive which is backed up daily.

- X 2. Reconciliation to source information - Reviews are in place by supervisory personnel to ensure that the data inputted or interfaced into the spreadsheet agrees to support documentation. RRQ model spreadsheets are fully documented showing sources (where appropriate) and receive supervisory review.
- X 3. Version controls and naming convention - to ensure that only current and approved versions of spreadsheets are being used. Each RRQ model spreadsheet includes the RRQ model name and the period in the file name. The spreadsheets also display the file path location and file name and are kept in shared-drive directories created and named for each RRQ model type and period.
- X 4. Overall analytics - were implemented as a detective control to find errors in spreadsheets used for calculations. There is an analysis section in each spreadsheet which allows for verification of calculation accuracy. Many cell formula calculations are shown on the spreadsheets for ease of review.

TAB	Contents / Assumptions
A. 2008 Revenue Requirement	<p>This worksheet tab is the revenue requirement model summary page. It shows:</p> <ol style="list-style-type: none"> 1. Lines 1-4 - Revenue requirement by component. This top section draws data from tab: "B. 2008 Total Year", the revenue requirement model except for Property Tax which is calculated on this worksheet. 2. Line 6 - Capital Additions (SAP) is the current month's gross additions. 3. Lines 7-13 - Plant, Reserve and Rate Base are pointed to tab: "C. Wtd Rate Base". 4. Analysis Section - calculates effective depreciation rate, return on rate base and taxes.
B. 2008 Total Year B. Reference View	<p>This is the actual revenue requirement model. It shows the revenue requirements effect of capital additions via depreciation expense, the return on rate base, the offsetting tax effects and the final grossed-up revenue requirements number.</p> <p>Tab: "B. Reference View" shows full formula and cell references.</p>
C. Wtd Rate Base	<p>This worksheet tab accumulates plant, reserve and book/tax depreciation data. It also calculates the weighted average rate base. This data is used to feed tab: "B. 2008 Total Year". The components are:</p> <ol style="list-style-type: none"> 1. Plant - cumulative capital additions. 2. Reserve - cumulative book depreciation expense. 3. Deferred Tax - difference between Book and Federal Tax depreciation times 35% (Federal Tax rate). 4. Weighted Average Rate Base Components - previous month plus current month amounts divided by 2. 5. Book and Tax Depreciation - draws from appropriate depreciation tab. 6. Deferred Tax - shown for a second time, see above.
D. Gross Additions	<p>This tab shows gross additions both for the month and on a cumulative basis. It is used to feed; 1) Line 6, "Capital Additions (SAP)" in tab: "A. 2008 Revenue Requirement", 2) the Plant line in tab "C. Wtd Rate Base", and 3) the book and tax depreciation tabs/calculatiions.</p> <p>Starting December, 2007, a new and improved BW additions report was developed with the Financial Applications Systems team. That report became the new source for the Smart Meter additions amount. It filters on Major Work Category 97, Smart Meter. The report was shared with Eric Lam, Smart Meter Business Analyst, who now uses it as well. He also gets a copy of each month's capital RRQ model and reviews the results for what is expected.</p> <p>There are separate RRQ models for PreDeployment and Deployment for both Electric and Gas for tracking purposes. The terms refer to cost-monitoring periods in the Smart Meter program. PreDeployment refers to the period in the program from inception (first additions in November, 2005) to September, 2006 at which time the Deployment period begins. Even though PreDeployment additions stopped in September, 2006 the depreciation expense, return on rate base, tax effects and associated revenue requirements are shown going forward.</p> <p>The 55/45% split (used to allocate common plant asset classes additions) comes from Eric Lam, Smart Meter Senior Business Planner, and is calculated from the percentage split between electric vs. gas meters expected to be deployed in the Smart meter project.</p>
E. Depreciation	<p>This tab calculates book depreciation which is used to feed tabs; 1) "A. 2008 Revenue Requirement" and 2) "C. Wtd Rate Base". The calculation is as follows:</p> <p>Book Depreciation calculation - previous month's cumulative adds, + 1/2 current month's adds, times current depreciation rate, divided by 12.</p>

	<p>This tab calculates Federal and State tax depreciation which is used to feed tab: "C. Wtd Rate Base" and is calculated as follows:</p> <p>F. FedTaxDepr G. StateTaxDepr</p> <p>For January of any year:</p> <ol style="list-style-type: none">1. the sum of the product of each prior years' additions, times the appropriate Federal Tax Depreciation rate (half-year convention), plus2. the current month's addition, times the current rate, divided by the number of months left in the year. <p>For February-to-December of any year:</p> <ol style="list-style-type: none">1. the prior month's depreciation amount, plus2. the current month's addition, times the current rate, divided by the number of months left in the year.
--	---

RRQ Component	Calculation	Source	What triggers change	Controls	Contacts	Risks
Depreciation Expense	Monthly depreciation equals the depreciable base times the current depreciation rate divided by 12. The base is the previous month's, inception-to-date additions plus 1/2 the current month's adds.	Depreciation rates come from the May 1 Letter. The additions come from a B/W additions report (Smart Meter and Demand Response) or an MLX additions report (Ag-Ice).	May 1 Letter (depreciation rates)	Line items added to model showing inputs and the actual calculations so preparer and reviewer can verify formula-driven results. Check List for revising rates.	Capital Accounting, depreciation desk (Ginny Ng).	If new rates not updated. New controls should prevent.
Return on Rate Base	The ROR calculation is the Rate Base (2-month average of Plant less Depreciation Reserve less Deferred Tax) times the currently authorized Cost of Capital (currently 8.79%).	Plant is cumulative additions. Depreciation reserve is cumulative book depreciation expense. Deferred Tax is the difference between the book and Federal tax depreciation expense times the Federal tax rate (currently 35%).	Rate base components updated monthly with additions activity. ROR changes with new authorized cost of capital proceeding.	Hard copy of cost of capital sheet part of referenced work papers. Line items added to model showing cumulative additions and book depreciation expense so preparer and reviewer can verify Plant and Reserve numbers. New Dec07 additions report dramatically changed.	ROR - Capital Accounting, AFUDC desk or Revenue Requirements (Maybelline Dizon).	New ROR not updated, wrong adds or depreciation exp. New controls should prevent.
Income Taxes	The "Income Taxes" line item is the sum of: 1) Federal current income tax, State current income tax, and 3) deferred tax. The Federal/State current income tax is the income tax rates come from the RRQ model's taxable Income (RRQ model- calculated proposed revenue less the Federal/State	Tax depreciation and from the Tax Department.	Revised tax depreciation rates (very rare), income tax rates (very rare), cost of capital interest factor.	Tax Department's rate sheets and transmittal memo part of referenced work papers. Line items added to model showing tax depreciation rates and the actual calculations so preparer and reviewer can verify formula-driven results.	Tim Wedlake	Wrong rates used. New controls should prevent.
Property Tax	2-month average net plant (plant less dep. reserve) times the property tax rate (currently 0.998%)/12.	Methodology and rate comes from Mario Garcia, Capital Accounting property tax.	New GRC revised property tax rate or old GRC authorized interim rate revisions.	Will include in reference work papers statement from Mario Garcia describing correct rate and duration of use.	Mario Garcia, Capital Accounting property tax.	Wrong rates used. New controls should prevent.

Month	Action
Dec09	The Dec09 Deploy_Gas and PreDeploy-Gas RRQ models are being revised for new federal tax depreciation rates. See note at bottom of tab "Revised Tax Depr Rates"

Subjec FW: 2010/2011 Tax Year - Property Tax Rate

Mario,

Also, do you have a final factor for 2010/2011? The one I'm currently using is 1.196232%.

Thanks,

Jerry

Subjec 2010/2011 Tax Year - Property Tax Rate

Hi Mario,

Do you have an actual 2011/12 property tax factor yet, or is the 1.21912%.estimate still as good as we have?

Thanks,

Jerry

Subjec FW: 2010/2011 Tax Year - Property Tax Rate

Hi Mario,

Do you happen to have the 2011/2012 property tax factor? Even a very rough estimate is fine.

Thanks,

Jerry

check

s/b zero (Note 1)

Input to Deploy-
Electric ModelInput to Deploy-
Gas Model

Note 1: Nov2010 & forward SBMA-HAN adds are zero (HAN adds are 100% non-SMBA). This is because the \$600K maximum allowed SMBA-HAN additions were reached in Oct2010 (per discussion between J. Basel and G. DeGuzman 12-6-2010).

HAN orders are 6110703 and 6110704.

* Annual Rate applied to Gross Basis.

Source:

1/14/2010: Per Muoi Woodruff, and confirmed by Jack Battin, the above tax depreciation rates are effective immediately for the Gas RRQ models. Confirmed with Muoi that; 1) these rates should apply to all the historical SmartMeter Gas adds for the asset classes listed above, and 2) Electric rates are unchanged, including the Electric-portion of the CMP39708 adds. These gas rate changes are effective for capital adds from April 11, 2005 to Jan. 1, 2011 per Muoi.

Tax Class: GDP - Gas Distribution Plant: Distribution
CCE - Common Plant: Communic. Equip (AMI Gas)

SmartMeter Project
 Electromechanical Cost of Removal
 05/31/2010

Purpose: To summarize the electromechanical Cost of Removal (COR) costs incurred for calculating the associated capital-related revenue requirements.

Cost of Removal

	001/2006	002/2006	003/2006	004/2006	005/2006	006/2006	007/2006	008/2006	009/2006	010/2006	011/2006	012/2006	001/2007

												670,192.00	
												2,168,892.00	

Note 1: In March 2009 a COR Reallocation Adjustment was made to reduce the net plant recorded to the SmartMeter Capital RRQ model. As a result, the SmartMeter Capital RRQ did not calculate the associated capital-related RRQ associated with COR, effective March 2009.

Note 2: In Sept 2009, Nov 2009, Dec 2009, Jan 2010, and Mar 2010 the COR associated with the SmartMeter early retirements was charged to expense and recovered through the SmartMeter balancing account in accordance with the D.09-03-026 (SmartMeter Upgrade decision). As such, the COR associated with early retirements is excluded from the above amounts.

Note 3: In Mar, Apr, and May 2010 the above amounts are estimated amounts based on Business Warehouse data. Actual COR amounts will be provided via PowerPlant.

Subjec COR Monthly Data

Jack,
Attached is COR monthly data for the 2 asset classes: EDP37000 and GDP38100. As discussed on our phone call i
Please let me know if you require anything else to run the models.

Thanks,
Gabe

reating the associated models.

t was noted that a portion of the total COR was previously recovered through Jerry's SmartMeter models. We were a

ble to confirm apprx \$22M was adjusted out of the models in Mar 2009 and Apr 2009 which means we recovered the

associated capital-related revenue requirement in the models through these time periods in the balancing account. I

believe this will have the impact of lowering the tax benefit estimate that was calculated earlier. Please note we will

need to run the model(s) for the time period of March 2009 - May 2010 only.
