Subject: RE:

No pressure reductions decision today.

We're talking internally about having a more open process on that -- having you guys file some version of the results of the model runs on customer impacts, so the Commission can weigh that against the safety benefits of lowering pressure.

Bill S. brought by copies of your filing today on the other matter.

Where are we on the pressure reductions ? Is it something you expect to resolve today ? Also, I saw the notice on the Apr 11 hearing. We will be filing our motion today seeking clarification of what the hearing is going to do. We want to avoid an adverse finding that we engaged in will conduct that should result in a contempt filing while also avoiding a debate in he said she said. I would appreciate any feedback on that.
