Subject: Personnel Announcements

Officers & Directors:

I'm pleased to announce that Brian Cherry will temporarily assume the role of Vice President, Regulation & Rates, effective today. Brian will assume the duties previously performed by Jane Yura, who took on the role of Vice President, Gas Engineering and Operations in mid February.

Brian brings a wealth of regulatory and industry experience to his new assignment. After joining PG&E in 2000, he served in a number of regulatory positions before becoming Vice President, Regulatory Relations, in July 2006. Prior to joining PG&E, he was lead director for the team that created Sempra Energy, the holding company for SoCal Gas and SDG&E. At the Sempra companies, he held positions in Accounting and Finance, Procurement, Pipeline Transportation, Contracts, Gas Trading and Regulatory Affairs. Brian has a bachelor's degree in economics and political science from UCLA, and an MBA with an emphasis in finance from USC.

I'm also pleased to announce that Meredith Allen, Senior Director in Regulatory Relations, will fill in behind Brian and manage Regulatory Relations during the term of Brian's assignment. Meredith joined PG&E in 2005 as Chief, Regulatory Relations, taking on responsibility for such issues as renewable contracts, AB 32 implementation, and energy efficiency. Prior to that, she served as Senior Regulatory Counsel at Sempra Energy. Meredith received her undergraduate degree in political science from Benedictine College in Atchison, Kansas, and her J.D. degree from U.C. Berkeley's Boalt Hall School of Law.

The length of time Brian and Meredith will serve in these new roles is uncertain, but could last up to six months. At that time or sooner, we'll know whether Jane Yura will return to her previous duties or continue in her current role within gas engineering and operations.

Please join me in welcoming Brian and Meredith to their new interim assignments.

Tom
