Sid,

We met with some representatives of the EU the other day, and they asked for some big picture info, such as the average price for a kwh. It has been awhile since I last saw that info, and I think my guess overstated what it is. I've found the EIA statewide averages, but cannot find company specific data on the FORM 1 or other sources.

Do you have ready access to the following information? Any recent year will do (just tell me the year).

Residential Average  
Price

Residential Non-Care  
Average Price

Residential Care  
Average Price

Commercial Average  
Price

Industrial Average  
Price

Do not spend a lot of time on this. It is just a background inquiry. If it requires too much time, just let me know.
