Subject: RE: Basic Question: Distance from Milpitas to San Francisco?

Frank, how accurate do you need?. I do not have the exact numbers in front of me but the round numbers are;

L-101 is about 45 miles from Milpitas to the SF load center
L-109 is about 53 miles
L-132 is about 52 miles

I have a call into the team and can get the decimal places.

Kirk

Subject: Basic Question: Distance from Milpitas to San Francisco?

Kirk and Brian -

Sorry to pester you with this, but I am preparing a talk for the Energy Bar Association conference in two weeks, about the San Bruno rupture.

Can you please give me the distance, in miles, from the Milpitas Terminal to the terminus of Line 132 (and the other Peninsula pipelines -- 109 and 101) in San Francisco?

I realize this is common knowledge, but I don't have the information at hand, and I'm under a time crunch to get this presentation done.

Thanks.

Frank
