Subject: RE: Hydro Testing: Response to Julie Halligan's Letter to Kirk Johnson

Thanks Bill. Just fyi, we will be getting an official notification to PG&E from CPSD Deputy Director Julie Halligan. There will be some additional information that we want to get going forward, for example, related to copies of the finalized protocols and plans referenced in the letter, testing protocols for the cans removed to perform the hydrotesting, more detailed information on the test segments, and the like, but we anticipate giving the go ahead. Our staff is satisfied that we can work these things out as it goes along. We have also consulted with the expert from the Independent Review Panel (Mr. Nickell) to better understand the concerns about hydrotesting he had conveyed to Paul Clanon and he is comfortable that the 1.5 MAOP test pressure level, in combination with testing of the removed pipe, results in only a very slight risk and he encouraged the testing move forward ASAP. He will give us some additional feedback tomorrow but said that based on our description of the plan, no need to hold up beginning the notification process, so, this is not the official go ahead but expect it before 5:00.

I am now moving to the customer notification and hope to get that back to you soon.

Michelle

Thank you Michelle. I had an unexpected meeting come up from 2-2:30. I will leave here at 2:30 with the hard copies of our response letter and the data CDs.

Also, I will be out of the office from tomorrow through next Monday. Trina will cover my issues while I am away from the office. In the event that you don't have it Trina's contact information is 973-6490 or

tnhc@pge.com.

We look forward to hearing from you.

Julie:

I need to follow up on the note I just sent you on our hydro testing program. We really need to know by the close of business today if we can proceed with our customer notifications for the first two hydro tests. In order for them to stay on schedule we need to mail the notifications tomorrow and will have to complete the production of the notices overnight tonight. Otherwise the entire testing program schedule will be delayed.

If you could let us know by 5 p.m. or earlier if we can proceed with our customer communications that would be very helpful.

Thank you.

Bill

Julie:

Attached is our response to your April 8 Letter to Kirk Johnson. I am sending you this electronically to expedite your review of our answers to your questions.

The letter references additional enclosures which are maps of the test sites. Those files are massive and I have had them copied to data CDs. I will be coming to the Commission this morning to hand deliver those to you and the CCs to this e-mail along with hard copies of the attached letter.

Please let me know as soon as possible if you need any more information on this as we need to start our customer communications as soon as possible.

Thank you.

Bill
